

PoS v3.0 Network

devteam@chavinci.com

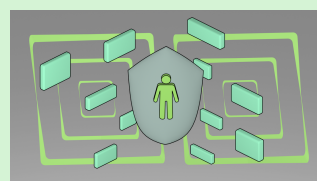

Chavinci is revolutionizing the Blockchain as a Service (BaaS) with Modular Ledger Technology (MLT) and is built on Cha PoS v3.0 Network. Focused on making blockchain technology accessible to the end-user.

Our ability is to provide organizations with easily accessible ledgers that can be customized to meet their unique needs without using 3rd parties. Users will have only one wallet to reach all services.

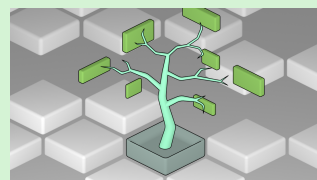

We're making DLT technologies more approachable, secure, scalable, and efficient.

## Cha PoS v3.0 Based MLT

Unspent Transaction Output (UTXO)

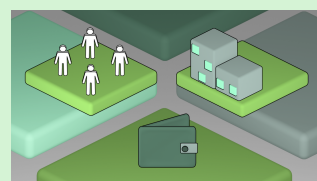

Inter Planetary File System (IPFS)

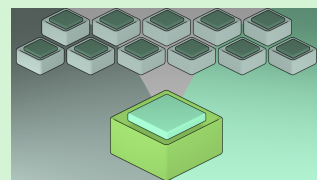

Easy Develop API&SDK

PoS v3.0 Consensus Algorithm

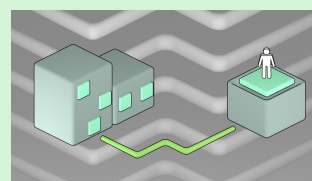

PoS v3.0 Reward Halving

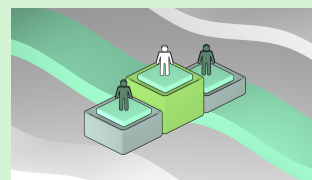

Ledger Specific Explorer

Native Token

Unique Seed Phrase

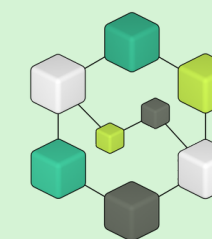

Customizable Core Ledger

## Modular Ledger Technology

Web-Mobile-Desktop and Cha Core Wallet

Real World Asset Tokenization

D-Mail on IFPS

Easy Accesibility For End-User

Interoperability

Customizable Ledger Infrastructure

**D-Mail System by Chavinci** revolutionizes blockchain communication with KYC-enabled trust, verified and secure interactions. Its cross-ledger integration will facilitate connectivity across the network. Designed with the user in mind, D-Mail offers a versatile platform for a range of applications, embodying the future of network communication with multiple tools.
